CO-OP Mobile

Be there for your members with superior mobile access wherever they go.

Mobile banking is now indispensible for any credit union competing for consideration as a member's primary financial institution. CO-OP Mobile enables you to offer a leading-edge, custom-branded app tailored to your needs—without the costly and time-consuming complexities involved in developing a solution in-house.

Consumers are demanding mobile banking capabilities. CO-OP Mobile lets you give them the features they're looking for, delivered through an attractive interface that's easily customizable to reflect your credit union's brand. In addition, CO-OP Mobile is supported by robust Client Portal back office tools to simplify your management tasks. And it's driven by CO-OP Connect technology, which expedites implementation for credit unions already participating in CO-OP Shared Branching, and introduces others to a new and continuously developing universe of easily accessible, leading-edge products and services.

What's In It For You

- Keep your credit union relevant in a rapidly evolving consumer environment
- Offer the enhanced functionality members want
- Tailor a solution to your specific needs
- Reinforce your identity with a custom-branded interface
- Strengthen your reputation as a provider of valuable, innovative products and services
- Accommodate a broad base of members using iPhone® and Android™ devices
- Implement a full-featured solution quickly, easily, and affordably
- Minimize management time with Client Portal Web-based back office application

What's In It?

- iPhone® and Android™ apps custom-branded throughout for your credit union
- Account aggregation for access to all accounts at your credit union on one app

- Real-time, person-to-person payments to anyone in- and out-of network with RealPay by CO-OP*
- Remote deposit capture, integrated with Ensenta's EZAdmin solution*
- Text banking*

Optional features

Is It Right For You?

Credit Union Challenges	CO-OP Mobile Solutions
I need a mobile solution that delivers the advanced functionality members expect.	Extensive standard features complement advanced options that include real-time, person-to-person payments and remote check deposits.
I want to strengthen our identity as a primary financial institution known for leading-edge services.	Leading-edge technology lets you offer an app with features that rival those available from big banks, helping attract and retain members—especially tech-savvy Millennials.
I need to introduce a powerful mobile app quickly and easily, without the expense and development challenges of creating one ourselves.	Implementation is easy and inexpensive, especially if you're already employing CO-OP Connect technology through CO-OP Shared Branch participation.
I want to be able to add advanced features when we're ready.	Current and future optional features can be added at any time to provide members with an enhanced mobile experience.
I want to deliver a superior member experience, while minimizing additional workload on our staff.	Client Portal application provides Web-based back office functions that make it easy to efficiently monitor and manage users with services including account access, member lockout, RealPay by CO-OP reporting tools and enrollment troubleshooting.
